## Project

### Cedar Village Retirement Community Dining Room Addition and Remodel

## Location

Mason, Ohio

## Owner

Cedar Village

## Project Cost

\$2,600,000

## Project Description

ArchitectsPlus has completed the design and documents for a series of renovations and additions for this nursing and assisted living complex. Interior renovations were developed for a number of the nursing, administration, and resident areas. This project involved the design of a new central dining room addition that included a major renovation of the facility's main kitchen. Since the facility is predominantly for Orthodox Jewish residents, two main kitchens were required: one for the preparation of meats and one for dairy. As part of the dining room addition, the original remote dining areas were converted to additional resident rooms.
