Project

DNA Diagnostics Center

Location

Fairfield, Ohio

Owner

DNA Diagnostics Center

Project Cost

Withheld at Owner's Request

Project Description

This project consisted of a 5,000 SF and a 6,500 SF addition which surrounded a new 14,000 SF courtyard garden in an area which was formerly a parking lot between two existing buildings. The smaller, north building included a formal entry lobby, conference rooms, and private offices. The larger, south building included an open office area, library, labs, and directors offices. The facility remained operational during the nine months of construction.
