Project

Farmers & Merchants Branch Bank

Location

Germantown, Ohio

Owner

Farmers & Merchants Bank

Project Cost

\$1,000,000

Project Description

This 3,000 SF branch bank is located at the entrance to a new development that includes retail establishments along the public way and single family homes beyond. The bank is designed with a residential scale. The interior features more closely resemble a home than a financial institution. The stone fireplace adds warmth to the waiting area, while the clerestory windows above wash the lobby with natural light. The residential scale is further reinforced with the combination of stone, brick, and stucco on the exterior elevations, which provide a dynamic appearance from the street.
